INFORMATION REPORT INFORMATION REPORT

Approved For Release 2001/04/02 : CIA-RDP81R00560R000100070007-8

Date	Local Time	Area over which seen	Direction of flight	Particulars of the object
25 February 1968	Between 1100 & 1130	Northeast Nepal Walungchung-Cols and Ghunsa area	North-East to South-West	A fast-moving object, long and thin, emitting red and green bright light, as bright as to cause daylight. Thunder sound heard after few seconds of sighting of object.
19 February 1968	Between 1100 & 1135	Chim Lachung, Lachen, Thangu, Muguthang and Chholhamu	This information is rather confusing. Direction was reported as being from South-east to North-west over Thangkaria, Lachung, Lachen & Muguthang. Over the Lhamo and Sese La, the direction was reportedly from North-east to South-west. The latter direction coincides with the one over Nepal and is likely to be more correct since the date and timing of the flight of object also coincide.	Object giving bright light from tail. It bright enough to brighten the entire area. Thunder sound was heard after sighting the object.

Date	Local Time	Area over which seen	Direction of flight	Particulars of the object
<u>Bhutan</u>				
21 February 1968	2130	Thimpu	East to West. However since due east of Thimpu there is nothing but Indian territory the direction of flight could well be from North-east to South-west, that is, from the direction of Tibet.	A bluish colored object moving at high speed without any noise. It was bright enough to brighten the area.
<u>Ladakh</u>				
4 March 1968	1300	Ane La area	Object was following a circular path. Left a trail of smoke behind it.	
25 March 1968	2150	Fukche, Koyul, Demchok	Appeared from Chang La side and was seen moving towards Demochok, i.e. from north to south. Rocket-like object leaving white-yellow trail about 20 yds long at a height of 20-25,000 feet.

Date	Local Time	Area over which seen	Direction of Flight	Particulars of the object
25 March 1968	2015	<u>Nepal</u> Kaski region in NW Nepal.		Appeared to be north to south. A blazing object, flashing intermittently, accompanied by big, under sound disintegrated over Kaski region. A huge metallic disc-shaped object with a six-foot base and four feet in height was found in a crater at Balticheaur, five miles NE of Pokhara. Portions of a similar object were found at Talakot and Turepasal.
